Sitac

Operations are ongoing, the GRU has identified a data centre used by the Americans for their cyber operations. A battle plan is drawn up. Ironically, it is thanks to this datacenter that the Americans knew that the Russians had succeeded in identifying their infrastructures.

Objectives

→ Common

→ US Cyber command under control (3 pts) :

A section of the best code offuscation specialists is stationed not far from the datacenter. They operate from a farm that has been requisitioned and transformed into an operations centre. The capture of this HQ would be a great plus for the belligerents.

Condition : At least one person should be inside of a zone to consider it as captured.

→ Supremacy Bonus (2pts).

If there are less than 5 survivors on the opposite team, the team wins two more points.

◆ Bluefor

■ The datacenter is protected and operational. (5pts).

We have installed this datacenter in a tempest type bunker to protect us from attempts at compromise by electromagnetic signals. The data collected by our interception systems is sent raw to this datacenter awaiting processing.

Victory condition : Datacenter (inside the bunker) intact at the end of the game.

◆ Redfor

■ The datacenter is destroyed (5pts).

We have identified the datacenter to be destroyed by order of the GRU.

Victory condition : Datacenter (inside the bunker) destroyed at the end of the game.
